

The microSURE™ family of products are approved for sale in Canada as Hard-surface disinfectants and hand sanitizers (COVID-19): Disinfectants and hand sanitizers accepted under COVID-19 interim measure.

As an interim measure due to the COVID-19 pandemic, the government of Canada is making it possible for certain products of this type to be sold in Canada. These products may not fully meet regulatory requirements, but do not compromise the safety of Canadians. For example, these are products that:

may have:

- English-only labelling
- different packaging from what was authorized for sale in Canada

are authorized or registered in other jurisdictions where the regulatory frameworks and quality assurances are similar.

The microSURE™ family of hand sanitizers and disinfectants are covered by this interim measure.

Please visit the Health Canada website for additional information on this interim measure covering microSURE products approved for sale in Canada.
