

YOUR SAFEGUARD...

MICROSURE ALL PURPOSE CLEANER AND DISINFECTANT™

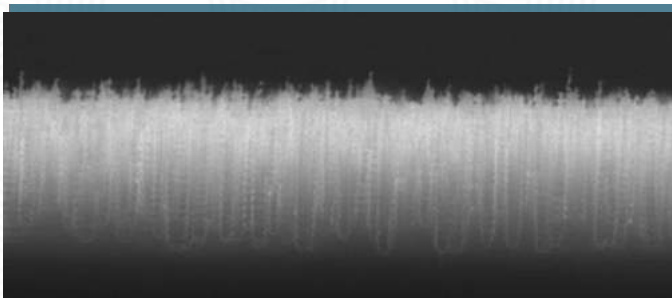

Virucidal - Bactericidal - Fungicidal

The traditional mode of action to combat transmission of harmful microorganisms on surfaces is to attack the germs with varying degrees of poisonous chemicals. These poisons are composed of alcohols, bleaches and acids, and are designed to target and destroy a microbe's outer membrane, resulting in a "chemical kill". Antimicrobial biocides are toxic compounds that are harmful to humans, plants and animals.

When a surface is coated with Microsure All Purpose Cleaner and Disinfectant, millions of "invisible", nanoscopic crystalline structures begin forming and bonding (with the surface), effectively forming a new surface. Resulting in a "mechanical kill", that will kill the cells of the bio threat trying to attach to the object.

PROTECTION THROUGH PREVENTION

- This newly mechanically modified surface is one that prevents adhesion, disrupts microbial communication and prohibits colonization, reproduction and proliferation.
- Microbes that are unfortunate enough to come in contact with a Microsure All Purpose Cleaner and Disinfectant modified surface, exhaust themselves, wither and die.
- Unlike traditional disinfectants, Microsure All Purpose Cleaner and Disinfectant stays in place long after you apply it.

**The material is approximately 4 Nano meters in size. The material has been developed in such a way as it creates "Crystalline Structures" which penetrates the cellular membrane.*

99.99% effective against the most common germs including E.Coli, Enterococcus hirae, P. Aeruginosa, Staphylococcus aureus, as well as many viruses, mold and fungi.

1

2 Dries on any surface forming a covalent bond.

2

3

Leaves Hard, Non-Porous Surfaces Disinfected.

- Will not degrade or discolor surfaces not harmed by water.
- Multi-purpose cleaner that can replace many other cleaning chemicals combined.
- Compatible with non-bleach disinfectants.

Instant killing action - lasting prevention

MADE IN USA

+ Ingredients present in Microsure™ products have been proven to effectively combat against emerging viral pathogens including SARS; A member of the Coronavirus family.
